Technical Skills

AI & Backend: LLMs, AI Agents, MCP, RAG, OpenAI, Anthropic, Langfuse, Python, Go, FastAPI, PostgreSQL, MongoDB, Redis, LanceDB

Cloud & Web: Azure (AI Foundry, Blob Storage, VMs), AWS, Docker, Nomad, GitHub Actions, TypeScript, React, Grafana, Sentry

Security & Compliance: SOC 2 Type II (Vanta), Keycloak (SSO/SAML), Casbin (RBAC), OWASP, SSRF, rate limiting, audit logs

Tools: GitHub, Stripe, Jira, Claude Code, Cursor

Experience

Tech Lead & PO May 2026 – Present
Genezio *Bucharest, Romania*

- Lead **engineering** as **Product Owner**: shape the roadmap, set priorities, mentor engineers, and own reviews and releases.
- Work with the **co-founders**, **Sales**, and **Marketing** to turn fast-moving, ambiguous ideas into clear plans the team can ship.
- Built core parts of the **product's engine**, tracking how **9 AI assistants** (ChatGPT, Gemini, Claude, and more) talk about each brand.
- Opened the platform to integrations with a **public REST API** (100+ endpoints), an **MCP server** for AI agents, and developer docs.
- Took **AI Shopping** from idea to release, showing brands which of their products AI recommends and how they are perceived.
- Launched **ChatGPT Ads Intelligence** and **Agent Analytics**, two new products that widened what customers can track.
- Made the platform **enterprise-ready** with SSO (**Keycloak**, SAML) and role-based access (**Casbin**).
- Lead **platform security** and **SOC 2 Type II** compliance in **Vanta**, and answer the security sections of enterprise RFPs.
- Sped up delivery with a **monorepo** and one **CI/CD** pipeline that ships **20+ services** to **HashiCorp Nomad**.
- Lowered **cloud and LLM costs** with smaller models, **Azure OpenAI** batch tiers, prompt caching, and right-sized services.
- Stay hands-on as the top contributor, with **8,000+ GitHub contributions** in the last year.

Software Engineer Sept 2023 – Apr 2026
Genezio *Bucharest, Romania*

- Core member of the team that secured a **€2M pre-seed round** for a **serverless cloud platform**, later pivoting to develop **LLM brand visibility** and **enterprise AI agent testing** solutions.
- **Owner & Maintainer** of the backend and agents codebase, delivering **5000+ contributions** last year.
- Architected the **RBAC system using Casbin** to handle secure permissions and multi-account management.
- Built the **daily simulation engine** that executes user-defined scenarios and captures comprehensive interaction data.
- Implemented the **Metrics infrastructure** with robust **caching** for real-time analytics.
- Engineered **Red/Blue Team Agents** to simulate adversarial attacks and automate functional testing.
- Led **interviewing, onboarding, and mentorship** for interns/juniors, enforcing high code quality standards.

Full Stack Intern June 2023 – August 2023
Genezio *Bucharest, Romania*

- Enabled **CLI deployment** for **Lambda Functions** and **FastAPI**, directly streamlining developer workflows.
- Migrated **Next.js deployment** from OpenNext to a native solution, improving scalability and simplicity.
- Designed a **RAG system** using OpenAI & LangChain for context-aware Q&A on company documentation.
- Integrated the system into a **Discord bot** with **automated CI/CD** workflows using CircleCI.

Technical Coordinator Oct 2022 – July 2024
League of Electronics Students (LSE) *Bucharest, Romania*

- Managed the **IT Department**, training volunteers in **web development fundamentals** and **GitHub** workflows.
- Delivered key web applications: **LSE București** (organization website), **APV** (charitable cross-country platform, **500+ users**), **BBETTI** (voting platform, **1,000+ users**), and **Laundry Reservation** (**700+ users**).

System Engineering Intern July 2022 – Sept 2022
Huawei Enterprise GSC *Bucharest, Romania*

- Worked with enterprise storage protocols (SAN/NAS, RAID) and Linux server administration.

Education

National University of Science and Technology Politehnica Bucharest — Bucharest, Romania
M.Eng. in Information and Computing Systems Engineering — *Oct 2025 – Present*
Faculty of Electronics, Telecommunications and Information Technology
- **Dissertation (WIP)**: Information Visibility in the Age of LLMs

National University of Science and Technology Politehnica Bucharest — Bucharest, Romania
B.Sc. in Computer Science — *Oct 2021 – July 2025*
Faculty of Electronics, Telecommunications and Information Technology
- **Bachelor Thesis**: Automatic Generation of REST and GraphQL API Interfaces using LLMs

Projects

Bachelor Project - AI Agent System — May 2024
Python, FastAPI, React, MongoDB, Gemini, AWS, Docker
- Built a **multi-agent** system to generate REST/GraphQL APIs, with FastAPI + MongoDB and SSE streaming.

Personal Portfolio Website — Oct 2024
Next.js, React, Tailwind CSS, Vercel, Cloudflare
- Developed a modern, high-performance **portfolio website** using **Next.js** and **Tailwind CSS**.
- Optimized for speed and security, deployed on **Vercel** with **Cloudflare** for DNS management.

Audio Analysis Platform — Jan 2024
Hardware, ESP32, FastAPI, React, WebSocket, Signal Processing
- Built an ESP32-based audio pipeline with FFT/filtering and real-time streaming to a React dashboard via WebSockets.

Facial Emotion Recognition — Jan 2024
Python, PyTorch, Vision Transformers (ViT), Streamlit, Docker
- Built a FER system with a ViT model in PyTorch, optimized with Mixup, Label Smoothing, and TTA.

Awards

3rd Place – Scientific Communications Session: Bachelor Thesis — May 2025
National University of Science and Technology Politehnica Bucharest
- Awarded for the final implementation of the "Automatic Generation of REST and GraphQL API Interfaces using LLMs".

4th Place – Scientific Communications Session: API in Seconds — May 2024
National University of Science and Technology Politehnica Bucharest
- Awarded for the initial prototype of the AI-driven backend generation platform.

1st Place – Electron Hackathon: Electrify the Campus — May 2023
LSE Bucharest, Romania
- Built a smart campus parking solution with YOLOv5 + EasyOCR and an ESP32 barrier system.

2nd Place – Scientific Communications Session — May 2023
National University of Science and Technology Politehnica Bucharest
- Built a stolen-car finder app using YOLOv3 and OpenCV-based image processing pipelines.

Volunteering

Mentor — Mar 2025 – Present
Innovation Labs — *Bucharest, Romania*
- Mentoring early-stage startups on technical architecture, product scalability, and MVP development strategies.

Board Member — Oct 2023 – 2024
League of Electronics Students (LSE) — *Bucharest, Romania*
- Representing students in the Board of Members, ensuring their concerns are addressed in decision-making processes.

Student Representative — Dec 2022 – 2024
National University of Science and Technology Politehnica Bucharest — *Bucharest, Romania*
- Acted as a bridge between the student body and faculty administration, advocating for academic improvements.
