TECHNICAL SKILLS

AI & Backend: LLMs, AI Agents, RAG, OpenAI, Anthropic, Langfuse, Python, FastAPI, PostgreSQL, MongoDB (Atlas), Redis

Web & Cloud: TypeScript, React, Next.js, Tailwind CSS, Docker, AWS, GCP, Azure, Cloudflare, Grafana, Sentry

Dev Tools & Productivity: Jira, Confluence, Slack, GitHub, Postman, TablePlus, Stripe, Upstash, Cursor

EXPERIENCE

Technical Team Lead

Genezio

May 2026 – Present

Bucharest, Romania

- Organizing the **engineering team**, prioritizing **key features**, and driving execution.
- Owning incoming requests from **Sales** and supporting **strategic customers** when needed.
- Leading **code reviews** and running **weekly planning + weekly sync meetings**.

Software Engineer

Genezio

Sept 2023 – Apr 2026

Bucharest, Romania

- Core member of the team that secured a **€2M pre-seed round** for a **serverless cloud platform**, later pivoting to develop **LLM brand visibility** and **enterprise AI agent testing** solutions.
- **Owner & Maintainer** of the backend and agents codebase, delivering **5000+ contributions** last year.
- Architected the **RBAC system using Casbin** to handle secure permissions and multi-account management.
- Built the **daily simulation engine** that executes user-defined scenarios and captures comprehensive interaction data.
- Implemented the **Metrics infrastructure** with robust **caching** for real-time analytics.
- Engineered **Red/Blue Team Agents** to simulate adversarial attacks and automate functional testing.
- Orchestrated **platform releases**, ensuring stability and quality assurance in production.
- Led **interviewing, onboarding, and mentorship** for interns/juniors, enforcing high code quality standards.

Full Stack Intern

Genezio

June 2023 – August 2023

Bucharest, Romania

- Enabled **CLI deployment** for **Lambda Functions** and **FastAPI**, directly streamlining developer workflows.
- Migrated **Next.js deployment** from OpenNext to a native solution, improving scalability and simplicity.
- Designed a **RAG system** using OpenAI & LangChain for context-aware Q&A on company documentation.
- Integrated the system into a **Discord bot** with **automated CI/CD** workflows using CircleCI.

Technical Coordinator

League of Electronics Students (LSE)

Oct 2022 – July 2024

Bucharest, Romania

- Managed the **IT Department**, training volunteers in **web development fundamentals** and **GitHub** workflows.
- Delivered key web applications: **LSE București** (organization website), **APV** (charitable cross-country platform, **500+ users**), **BBETTI** (voting platform, **1,000+ users**), and **Laundry Reservation** (**700+ users**).

System Engineering Intern

Huawei Enterprise GSC

July 2022 – Sept 2022

Bucharest, Romania

- Worked with enterprise storage protocols (SAN/NAS, RAID) and Linux server administration.

EDUCATION

National University of Science and Technology Politehnica Bucharest

M.Eng. in Information and Computing Systems Engineering

Bucharest, Romania

Oct 2025 – Present

Faculty of Electronics, Telecommunications and Information Technology

- **Dissertation (WIP):** Information Visibility in the Age of LLMs

National University of Science and Technology Politehnica Bucharest

B.Sc. in Computer Science

Bucharest, Romania

Oct 2021 – July 2025

Faculty of Electronics, Telecommunications and Information Technology

- **Bachelor Thesis:** Automatic Generation of REST and GraphQL API Interfaces using LLMs

PROJECTS

Bachelor Project - AI Agent System

May 2024

Python, FastAPI, React, MongoDB, Gemini, AWS, Docker

- Built a **multi-agent** system to generate REST/GraphQL APIs, with FastAPI + MongoDB and SSE streaming.

Personal Portfolio Website

Oct 2024

Next.js, React, Tailwind CSS, Vercel, Cloudflare

- Developed a modern, high-performance **portfolio website** using **Next.js** and **Tailwind CSS**.
- Optimized for speed and security, deployed on **Vercel** with **Cloudflare** for DNS management.

Audio Analysis Platform

Jan 2024

Hardware, ESP32, FastAPI, React, WebSocket, Signal Processing

- Built an ESP32-based audio pipeline with FFT/filtering and real-time streaming to a React dashboard via WebSockets.

Facial Emotion Recognition

Jan 2024

Python, PyTorch, Vision Transformers (ViT), Streamlit, Docker

- Built a FER system with a ViT model in PyTorch, optimized with Mixup, Label Smoothing, and TTA.

AWARDS

3rd Place – Scientific Communications Session: Bachelor Thesis

May 2025

National University of Science and Technology Politehnica Bucharest

- Awarded for the final implementation of the “Automatic Generation of REST and GraphQL API Interfaces using LLMs”.

4th Place – Scientific Communications Session: API in Seconds

May 2024

National University of Science and Technology Politehnica Bucharest

- Awarded for the initial prototype of the AI-driven backend generation platform.

1st Place – Electron Hackathon: Electrify the Campus

May 2023

LSE Bucharest, Romania

- Built a smart campus parking solution with YOLOv5 + EasyOCR and an ESP32 barrier system.

2nd Place – Scientific Communications Session

May 2023

National University of Science and Technology Politehnica Bucharest

- Built a stolen-car finder app using YOLOv3 and OpenCV-based image processing pipelines.

VOLUNTEERING

Mentor

Mar 2025 – Present

Innovation Labs

Bucharest, Romania

- Mentoring early-stage startups on technical architecture, product scalability, and MVP development strategies.

Board Member

Oct 2023 – 2024

League of Electronics Students (LSE)

Bucharest, Romania

- Representing students in the Board of Members, ensuring their concerns are addressed in decision-making processes.

Student Representative

Dec 2022 – 2024

National University of Science and Technology Politehnica Bucharest

Bucharest, Romania

- Acted as a bridge between the student body and faculty administration, advocating for academic improvements.
